Delivery Available NO

Shipping Available NO

Description

Features

- For residential or commercial use as your main entrance, backyard/courtyard entrance or as point of entry to your gated storage facility, yard or workshop
- Fully welded, heavy gauge steel structure and privacy cover panels for maximum concealment, safety and peace of mind
- In-ground rail track design that provides a seamless entry/exit experience for vehicles with no bumping or excessive wear and tear
- H-style track and galvanized steel rollers ensure gate stability and a secure, strong, reliable sliding motion with no wobbling or shaking
- Heavy-duty, 3-1/4" x 3-1/4" stabilizing extension side frame gives the gate a durable, high-strength cage for pass through and support
- Double layered protection from galvanized steel and baked on powder coating that creates long lasting resistance to rust, wear and corrosion
- Easy to assemble and quick, efficient install on your property; bolt-on design with two 10' sections joined together to form one full 20' piece

 - Shipping dimension: 120" x 10" x 80" each pack
 - Shipping weight: 660 l

Product Description

The TMG-MGS20 Driveway Privacy Sliding Ornamental Wrought Iron Gate welcomes everyone to the home or workshop and protects your investments at the same time. Whether you're using it for a residential or commercial property, the fully-welded structure and privacy cover panels provide maximum concealment, safety and peace of mind. This gate is an elegant security detail that will stand up to the weather even in remote and rural areas.

A rail track that is designed to sink into the ground creates a seamless entry/exit point for your guests, visitors and loved ones. This allows vehicles to drive over the rail area without any bumping or excessive wear. The H-style track design and galvanized steel rollers ensure the gate has a strong, stable and secure sliding motion with no shaking. Also included is a heavy-duty stabilized extension side frame for even more support and durability.

Galvanized steel and baked-on powder coating provide a double layer of protection to keep your gate free of rust and wear for many years to come. This product will require almost zero maintenance compared to other models on the market made of lightweight, lower quality materials that often need to be touched up and repainted.

TMG Industrial 20-ft Driveway Privacy Sliding Wrought Iron Gate, Fully Welded Structure & Panels, In-Ground Rail Track, TMG-MGS20
