

**Sale Name:** CRANBROOK-June 14th, 2023

**LOT 147 - TMG Industrial 7 Ton Quick Change Hydraulic Breaker-Unused**

**Shipping Available** NO

**Delivery Available** NO

**Description**

**Features**

- Versatile industry applications in construction, cleanup, demolition, mining, oil and gas, logging, mining, tunneling and other quarry operations
- 600 J of impact energy delivered at a rapid 500-900 BPM collision rate, perfect for light to medium sized projects
- Compatible with 4 to 7 ton excavators and backhoes with a simple quick-change lugging profile for easy attachment and release
- Maximized power to weight ratio and nitrogen-charged operation provides superior break force efficiency and long-lasting work capacity
- Bottom tie rod bolted design offers easy maintenance and overall heavy-duty, 550 lb construction offers dependable, high-level performance

- Included ½" hydraulic hoses that have a working flow rate of 9.5-16 GPM and deliver hammer force pressure at 1600-2500 PSI
- Sleek, compact design that delivers tremendous output while minimizing vibration, noise, and wear on your excavator or backhoe

## Specifications

- Operating weight: 550 lb
- Working pressure: 1600-2500 PSI
- Working flow: 9.5-16 GPM
- Impact rate: 500-900 BPM
- Impact energy: 600 J
- Chisel diameter: 2-¾"
- Hydraulic hose diameter: ½"
- Ear spacing - inside: 10-¼"
- Ear spacing - outside: 11-½"
- Pin center to center: 9"
- Quick-change lugging profile design

## Includes:

- (1) 2-¾" Moil point chisel
- (2) ½" Hydraulic hose with NPT fitting
- (1) Nitrogen charge kit with CGA580 cylinder adaptor
- (1) Service tool kit

## Product Description

**The TMG-HB70Q Excavator/Backhoe Hydraulic Hammer Breaker is a powerful tool attachment that turns your machine into a versatile, multi-trade asset. Perfect for light and medium sized jobs. Capable of smashing through rock and concrete with 600 J of impact energy, this hammer breaker has endless applications in industries like oil and gas, construction, logging, demolition, mining, tunneling and other quarry operations.**

Compatible with 4 to 7 ton excavators and backhoes, the simple quick-change lugging profile makes for easy attachment and release so you can quickly get to work and focus on getting the job done. The 2-¾" moil point chisel is made of hardened, industrial grade steel and is built to perform under the 1600-2500 PSI of pressure delivered through the breaker's hydraulic operating system.

Maximized power to weight ratio and a nitrogen-charged cell provide superior break force efficiency and long lasting, durable 500-900 BPM working action. A bottom tie rod bolted design allows for easy maintenance throughout the years.

**TMG Industrial 4-7 Ton Excavator/Backhoe Hydraulic Hammer Breaker, Quick Change (Q/C) Lugging, 2-3/4" Moil Point Chisel, 600 J Impact Energy, TMG-HB70Q**

**Quantity: 1**
