LOT 9 - TMG Industrial 1000lb. Rotating Engine Stand-Unused

Description

Features

- Crafted with heavy-duty steel, providing long-lasting durability and strength to support up to 1000 lb load capacity and securely hold most foreign and domestic engine blocks
- Mounting head with four adjustable arms and 360° rotation, allowing for easy access to any part of the engine, simplifying engine maintenance and reducing labour times
- Two fixed casters and two 360° swivel casters helps the engine stand maneuver smoothly around the workshop or garage even with an engine mounted on it

- Designed with an extra-wide base for maximum stability during use, ensuring that the stand remains upright and secure, even when the engine is being rotated or worked on
- A compact and lightweight design is accentuated with a high-quality industrial luster finish that provides an extra layer of protection against rust and other elements

- Shipping weight: 50lb.

Product Description

The TMG-AES10 1000 Lb Rotating Engine Stand is the perfect tool for any mechanic that needs a durable and reliable solution for engine maintenance. Constructed with heavy-duty steel, this engine stand is built to withstand the toughest of environments long-term. It features a ½ ton (1000 lb) load capacity, and can securely hold most foreign and domestic engine blocks with ease.

The mounting head of the stand features four adjustable arms and 360° rotation, allowing for easy access to the most hard-to-reach areas. This will help to simplify repairs, saving you time and money. In addition, the engine stand is equipped with two fixed casters and two 360° swivel caster, which ensures smooth maneuverability around your workshop or garage.

Designed with an extra-wide base for maximum stability during use and finished with a high-quality industrial luster, this engine stand is an essential tool for any mechanic, offering the best in mobility, stability, and long-lasting performance.
