LOT 65 - TMG Industrial 12'x20' Metal Livestock Shed-Unused

Description

Features

- Great addition for any landowner who has a hobby farm, acreage or other agricultural operation that supports roaming livestock of any kind
- Galvanized corrugated metal sheet panels are highly resistant to corrosion, and an angled roof helps direct moisture off the structure
- Use to help keep animals dry and protected from the elements by stuffing with hay to provide warmth, comfort and insulation year-round
- Great for taking care of newborns, giving a place to feed, administering medicine or slowly introducing new additions to the herd
- Can also be used to stockpile materials, tools and equipment in different locations around your property for easy access and convenience
- Skid-mounted square tube base and an extra central support bar help to increase the structures rigidity for long lasting outdoor use
- All connection joints will require welding for the best durability and stability; it is also recommended to add a plywood lining for increased structure strength

Specifications

- Base and primary frame: 2" x 2", 16 GA
- Secondary frame: 1" x 1-3/4", 18 GA
- Metal cover sheet: 27 GA
- Assembly:
 - Approx. 4 hours welding required for all connection joints
 - Approx. 8 to 10 hours for two people to set up (welding included)
 - Assembly instructions included
 - Adding plywood lining is recommended
- Pull eyelets on both ends
- All assembly hardware include
- Shipping weight: 965 lb

Product Description

The TMG-MS1220L Galvanized Metal Livestock Shed is a great addition to your hobby farm, acreage or full-scale agricultural operations. Keep your livestock warm and protect them from the elements by giving them a safe haven out in the field that they can shelter and feed in for years to come. Built out of galvanized square tubing and corrugated metal sheet panels that are resistant to corrosion and wear for long lasting use.

A sloped angle roof design helps direct moisture off the structure to keep animals dry. You can fill this shed with hay to provide insulation and warmth for your animals any time of year. Use it as a privacy shield when you need to milk a cow or individually feed a timid new addition to your herd.

Great for taking care of newborns, administering medicine, introducing new animals and even stockpiling materials or small equipment and hand tools. Open front visibility allows you to check on animals and offers easy access for them in and out of the shelter

TMG Industrial 12' x 20' Galvanized Metal Livestock Shed, 240 Sq-Ft, 27 GA
