LOT 194 - TMG Industrial 12 Ton Air Hydraulic Bottle Jack-Unused

Description

Features

- 12 ton (26,400 lb) lifting capacity for all your undercarriage mechanical, tire change, equipment or vehicle lifting needs
- Adjustment screw that allows you to easily modify the lift height up to 6-1/2" for a total maximum height of 20"
- Vertical top can be powered both manually and pneumatically so you can use this jack whether or not you're near an air supply
- External double tension spring structure that ensures restoring forces for a gentle lowering action and less wear on the jack
- Air filter is built right into the pneumatic switch to help mitigate the chances of debris entering into and damaging the unit over time

-
- This product is packed in a carton crate shipping box
- Shipping dimension: 11" x 7" x 12" (L x W x H)
- Shipping weight: 30 lb

Product Description

The TMG-AJA12 Air Hydraulic Bottle Jack has a 12 ton (26,400 lb) lifting capacity for all your undercarriage mechanical, tire change, and general equipment or vehicle lifting needs. Designed with an easy-to-use adjustment screw so you can modify the height as needed.

A vertical top can be controlled by both manually and pneumatically so the operator has the versatility to be able to use this jack whether they're near an air source or not. The jack has a lifting height of 6-1/2" and can be used on sturdy blocks to reach higher frame bodies if necessary.

The external double tension spring structure ensures restoring forces, and an air filter has also been built into the pneumatic switch to reduce the chance of debris making its way into the unit. These features combine for reliable lift assistance that will serve you for many years to come.

TMG Industrial 12 Ton Air Hydraulic Bottle Jack, Manual & Pneumatic Control, Double Springs, 20" Lift Height, TMG-AJA12
