LOT 208 - TMG Industrial 30" Excavator Forestry Brush Muncher-Unused

Description

Features

- For use with 6-10 ton mid-sized excavators in forestry or agriculture on your farm, acreage, remote property or job site
- Process hard to reach trees, branches and fallen growth around rivers, creeks, ditches, ponds and other sloped or hilly areas
- 30" width is efficient for cutting larger branched trees and clearing thickets, overgrown branches or other congested areas of vegetation
- 16 heavy duty fixed teeth produce a consistent sized debris that is easy to clean up or can be left to degrade and enrich the natural surrounding areas
- Hydraulic piston motor with oil-in, oil-out design and 3rd case drain line for reliable use and long-lasting build quality you can depend on
- High-performing 7" diameter rotor that can transmit up to 3600 PSI effectively into the mulcher allowing you to chew up dense bush and vegetation of all kinds
- Pin grabber lugging mount which can be easily mounted/dismounted on several excavator makes and models

- **IMPORTANT:** A case drain line (3rd hose line--3/8") is required to be added prior to use of this attachment. The case drain line will relieve the excess pressure and drain it back to your return line, then into the reservoir. Without a case drain line installed properly, that extra pressure will blow a seal or damage your hydraulic line.
 - Recommend excavator: 6-10 ton
 - Hydraulic oil flow range: 16-21 GPM
 - Hydraulic system pressure: 3600 PSI
 - Hydraulic motor type: Piston motor
 - Hydraulic motor displacement: 44 ml
 - Working width: 30"
 - Rotor diameter: 7"
 - Rotor with teeth diameter: 15"
 - Number of belt: 4
 - Number of fixed teeth: 16
 - Max cutting capacity: 4"
 - Hydraulic hoses with 1/2 NPT fittings
 - Pin grabber lugging mount
 -
 - This product is packed in a metal crate shipping box
 - Shipping dimension: 42" x 33" x 30" (L x W x H)
 - Shipping weight: 1175 lb

Product Description

The TMG-EFM80 Excavator Forestry Brush Mulcher turns your mid-sized excavator into a tree and bush eating machine. A high quality, reliable piston motor powers 16 heavy-duty fixed teeth that chew through tough timber and turn it into a nicely sized mulch. Capable of tearing stumps right down to the ground leaving almost nothing to clean up. Perfect for applications in forestry, land clearing and property development.

Compatible with 6-10 ton, mid-sized excavators, this mulcher operates under 3600 PSI of pressure for high performing cutting action you can depend on. 30" of working width means you'll be able to latch onto large brush areas and quickly suck trees into the mulcher for fast, efficient, destructive working action.

A classic pin grabber lugging mount makes hookup and dismount simple and compatible with several excavator makes and models. This mulcher is a dynamic attachment that makes hard to reach trees and tangled, dense bush easy to reach and obliterate in a matter of minutes.

**TMG Industrial 30" Excavator Forestry Brush Mulcher, 6-10 Ton Carrier,
4" Dia. Cutting Capacity, Hydraulic Piston Motor, TMG-EFM80**
