 - Steel stand w/storage shelf
 -
 - This product is packed in a carton crate shipping box
 - Shipping dimension: 31" x 22" x 13" (L x W x H)
 - Shipping weight: 60 lb

Product Description

The TMG-APW20 Parts Washer features a 20 gallon tub with a 12 gallon working capacity to clean tools, parts, clamps, small pieces of equipment, automotive components and other implements of grease, dirt, grime, debris and oil. It has a reliable 120V electric pump that delivers a flow rate of 4 GPM and is ETL approved.

An embedded flush hose delivers a steady flow of solvent to efficiently wash away residues and buildup, and a fusible linked steel cover functions as a safety mechanism designed to prevent accidental injury in the case of fire.

Attached 5' power cord is regulated by a convenient on/off switch to control the electric pump. This washer is fixed on a heavy-duty steel stand with a storage shelf so you can have water based solvents, rags and any other components always close by.

TMG Industrial 20 Gallon Parts Washer, 5' Power Cord, 120V Pump, 4

GPM Flow, TMG-APW20
