Product Description

The TMG-LSN30 Indoor FAR Infrared Sauna Room brings the luxury, relaxation and health benefits of a spa into the comfort of your own home. A durable, tempered glass door welcomes you into a private, elegant space that is completely yours. Unwind while surrounded by 6 infrared heating elements that warm the inside to a maximum temperature of 65°C. Its economical, energy saving design is a lavish, cost-effective addition to any home.

Built from strong, natural Canadian hemlock wood, this sauna provides a classic cabin look and contemporary feel to any room you put it in. Contributes to physical, mental and general well-being with FAR Infrared rays that penetrate through your tissues to open pores and soften the body. Enclosed and insulated design offers you peace and quiet, or, pair your phone to the sauna's Bluetooth and listen to your favourite music or podcast through its dynamic speakers.

Big enough to accommodate three people, so you can choose to have some personal time alone or share the space with loved ones and friends. Enjoy cozy moments together and start a rejuvenating daily practice that can reduce fatigue, clear skin and increase alertness all at the same time. At an accessible price point, this is one of the best investments you can make for your health and home.

The sauna room achieves its peak performance when installed in an insulated indoor area with a room temperature of around 68°F. Installing the sauna in a less-than-ideal location, such as a garage, can adversely affect its performance, will not be able to reach to the temperature you expected.

TMG LIVING 3 Person Indoor FAR Infrared Sauna Room, Natural Canadian Hemlock, Bluetooth Speakers, Tempered Glass Door, TMG-LSN30
