

Sale Name: GREENWOOD, BC-JULY 27th, 2024

LOT 423 - TMG Industrial 10X20 Wire Mesh Chicken Run Shelter-Unused

Description

Features

- Spacious, protective enclosure for the healthy activity of chicken brood populations for farming and poultry processing applications of all kinds
- Heavy-duty galvanized and powder-coated steel frame is highly resistant to rust, wear and corrosion for a dependable, long-lasting structure
- Approximately 7' of height clearance makes standing up and walking in the structure easy to do for routine maintenance such as cleaning and collection
- PVC coated hexagonal wire mesh keeps your chickens in while keeping predators like cats, dogs, coyotes and hawks out
- Weather-resistant PE tarp cover provides shade and water protection on one side so your birds stay dry, rested, comfortable and stress free
- Quick slip-fit tube connection and pre-drilled footplates allow for easy assembly and installation so you can start operating right away

- Lockable steel gate is roughly 6' in height for secure in and out access that will keep your animals safe and protected with only one possible exit point

-
- This product is packed in a carton shipping box
- Shipping dimension: 81" x 24" x 8" (L x W x H)
- Shipping weight: 222 lb

Product Description

The TMG-CRS1020 10' x 20' Wire Mesh Chicken Run Shelter is a protective structure that keeps your animals safe and promotes healthy activity within their flocks. Approximately 7' of height clearance allows you to easily walk in amongst the brood which is unique compared to other models on the market. Allows you to maintain a clean living area in an uncramped space that mitigates disease and keeps the birds active and healthy.

Roughly 200 sq-ft of space is covered by a heavy-duty galvanized steel frame that is also powder-coated for maximum protection against rust, corrosion and wear. PVC coated hexagonal wire mesh keeps your chickens in and predators such as hawks, coyotes, dogs and cats out so you can get the most out of their long, healthy lifespans.

A weather-resistant polyethylene (PE) tarp covers one side of the enclosure to provide shade and rain protection. The spacious design gives occupants plenty of room to run, jump, perch and mingle amongst each other. Sturdy and secure lockable steel gate provides easy in/out access, and the quick put-together, slip-fit tube connections with pre-drilled footplates are easy to assemble and will have this coop up and operating in no time.

TMG Industrial 10' x 20' Wire Mesh Chicken Run Shelter Coop,
