## Product Description

**The TMG-FS10 10 Ton High-Capacity Floor Scale is a versatile and durable weighing option that is perfect for use in heavy-duty industrial and agricultural environments. The scale's large and sturdy platform can accommodate a wide variety of loading, making it an ideal choice for weighing heavy machinery, fuel tanks, building materials, recyclables, and even livestock. The steel checker plate surface provides a slip-resistant platform for safe weighing, while the adjustable feet ensure that the scale remains stable and level, even on uneven surfaces.**

Included is a digital scale that is lb/kg convertible, which allows you to easily switch between units of measurement depending on your needs. Additionally, the scale comes with full capacity tare and auto zero tracking features, which ensure that you get precise and consistent measurements every time you use it.

With a loading capacity of 10 tons (22,000 lb), this scale is ideal for industries such as shipping, construction, transportation, and recycling. Its rugged construction, versatile features, and superior performance all combine to provide reliable and accurate readings you can depend on for your business
