

Sale Name: GREENWOOD, BC-JULY 27th, 2024

LOT 470 - TMG Industrial 72" 3-Point Hitch Rotary Tiller-Unused

Description

Features

- Ideal for 40-60 HP tractors for the reworking and preparation of your acreage, garden, nursery or small hobby farm land
- Designed to prepare soil for seeding applications like vegetable patches or flower beds; breaks through hard grounds and turns up nutrient rich soil
- Forward-rotating tines dig hard into the ground and create well-aerated soil for gardens, seedbeds and overall land health and maintenance
- Low, forceful 214 RPM rotor speed ensures a thorough job is done after just one pass making for a steady, efficient workflow
- Adjustable skid shoes for depth control and adjustable formed rear deflector to keep dirt in and leave an even, leveled layer of soil
- Direct drive central and side gearboxes provide reliable power transmission and easy maintenance

- Included PTO shaft for Category 1 & 2 hookups make this tiller compatible with most tractor makes and models
 - Compatible with 40-60 HP tractors
 - Working width: 72"
 - Tilling depth: 6"
 - Flanges: 9
 - Tines per flange: 6
 - Total tine blades: 54
 - Rotor shaft: 214 RPM at 540 RPM PTO
 - Rotor swing diameter: 18"
 - Driveline shaft length: 31-1/2" - 43" (telescopic)
 - Adjustable skid shoes
 - Adjustable formed rear deflector
 - Included PTO driveline shaft, Category 1 & 2 hookups
 - Powder coated finish
 -
 - This product is packed in a metal crate shipping box
 - Shipping dimension: 79" x 27" x 30" (L x W x H)
 - Shipping weight: 700 lb

Product Description

The TMG-RT185 3-Point Hitch Rotary Tiller prepares your garden beds, nursery or hobby farm for seeding applications, landscaping and overall long-term land health and maintenance. Bring new life to your dirt by turning up old, tired grounds to reveal the fresh, nutrient rich soil available underneath. Comes with an included PTO shaft for Category 1 and 2 hookups and is compatible with most 40-60 HP compact tractors.

54 replaceable heavy-duty tines powerfully dig into the ground at a low, forceful speed of 214 RPM. This ensures a thorough, efficient reworking of the land after just one pass and leaves a beautiful layer of organic material settled evenly on top. Critical process for proper aeration and eco-diversity amongst the different sediments and starts to improve growing potential immediately.

Adjustable skid shoes allow you to control the tilling depth up to a maximum of 6", and the 72" width makes quick work of larger plots. Minor assembly required and easy to access gear boxes for simple maintenance over time. Enclosed side gearbox protects your power transmission and a powder coated finish ensures a dependable, long-lasting piece of equipment for you and your property.
