Product Description

The TMG-WH39 Metal Garage/Workshop Storage Shelves are a heavy-duty storage and organization solution for your garage, shop, automotive service department, warehouse, storage room and more. Built of tough steel frames with each individual shelf capable of holding 700 lb. Six total sections of 72" shelves, H-style uprights and horizontal beams combine for a 39' linear shelving unit.

Store, unload and organize heavy, bulky items in your shop, garage or warehouse but still have them easily accessible with the standard, open-faced design of these shelving units. No more cluttered mess looking for customer parts, tools and other miscellaneous items - just a clean assembly that is easy to arrange, systematize and regulate.

This shelving system has a simple snap together design that is easy to set up and built to last with its rugged industrial strength commercial construction. Each section has a total weight capacity of 2100 lb and three separate shelving heights, as well as an elevated ground shelf for easy cleaning underneath.
