Shipping Available YES

Delivery Available YES

Description

Features

- Approximately 400 sq-ft of floor space to accommodate all your power tools, motorized machinery, farm equipment, pick up truck, RV, off road vehicles or boat
- Two large garage door openings each provide an approximately 8' wide access opening for easy drive in/drive out of vehicles and farm equipment
- Industrial quality 16 GA steel frame and 27 GA metal cover sheets create a strong, stable frame
- Over 7' of height clearance makes parking your pickup or bringing out the ride on mower effortless and worry free

- Side entry door included and is installable on either side for an option that allows you to customize this shed according to the needs of your acreage farm or commercial property
- Constructed with electro-galvanized steel sheets and polyester paint for corrosion resistance, rust protection and an overall long lasting, dependable exterior
- Reinforced roof supports, wall bracings, and floor anchors make this metal garage built to last for years to come
- L-shape brackets with sleeve anchor bolts for easy installation on any solid wood platform, concrete slab or equivalent
- Sloped, vertical gable roof to help prevent snow and water build-up on harsh winter days or during the rainy season
- Enough space to park vehicles/equipment and still have room for a workshop or home project area
- Modern cream colour integrates seamlessly into any commercial yard or farm field opening
- Easy do it yourself, self-tap screw-together assembly that can be done with the help of a couple friends; no need to hire contractors or rent any expensive equipment

Product Description

The TMG-MS2119 Double Garage Metal Shed is a heavy duty, spacious, robust steel structure that can be used as a garage, workshop or storage building. Fully enclosed for year round protection of your boat, RV, pickup, off-road vehicles and farm equipment.

Two large garage door openings, each with an access width of over 8', give you ample space to drive into or bring materials in and out of. Included side door entry is installable on either side so you can customize this enclosure to fit the needs of your acreage, farm or commercial property.

Our metal garage has reinforced roof supports, wall bracings and anchors making it a dependable structure for the housing of all your valuable goods. It's built to last and capable of accommodating your needs with approximately 400 sq-ft of floor space that could be used as a covered

outdoors woodworking or mechanics shop. Fitted with galvanized, corrugated metal sheet panels and polyester paint that offer protective resistance against corrosion, rust and wear. Stockpile extra lumber, piping, motorized machinery and power tools; anything you need to help get the job done.

A sloped gable roof helps to prevent snow and water build up on those cloudy winter days. L-shape brackets with sleeve anchor bolts installation make this structure easy to install on any solid wood platform or concrete slab. Immediately increase the value of your property by adding to it this metal garage which is only a fraction of the cost compared to building a similarly sized structure.

TMG Industrial 21' x 19' Double Garage Metal Shed with Side Entry
