LOT 101 - TMG Industrial 60" Skid Steer Concrete Mixer Attachment-Unused

Delivery Available YES

Shipping Available YES

Description

Features

- Essential attachment for any skid steer operating in masonry, driveway/sidewalk repair and commercial or residential construction
- Reliable hydraulic chain and sprocket drive motor works under 3050 PSI of pressure for tough, superior mixing power
- Reversible revolving paddles thoroughly churn through concrete mix and keep it smooth for a high quality pour every time
- 16 cu-ft bucket capacity allows you to mix large quantities at once to save time and labour while out on the job site
- Side chute dispensary gives you the option of a more precise and controlled flow, or opt to pour out the front for bigger pad and sidewalk pours

- 60" hopper width has integrated bag splitters build right into the top so you can easily add cement without the hassle of ripping each bag
- Universal mounting plate fits most skid steer makes and models and offers a simple, quick attach mount/dismount to save time on the job

- Hydraulic chain & sprocket drive motor
- Removable steel grate w/bag splitters
- Hydraulic hoses & flat-face couplers included
- Universal skid steer mount
- Shipping weight: 1300 lb

Product Description

The TMG-SCM61 Skid Steer Concrete Mixer is an essential attachment for your skid steer if you or your company does any type of concrete work. Driveways, masonry, commercial and residential construction could all be made easier with the addition of this mixer and its versatile design. Simply hookup to your skid steer with the universal mount and you'll be immediately saving time, money and labour.

Churn up to 16 cu-feet of cement at a time with the bucket's large capacity and heavy-duty overall construction built to handle even your toughest concrete jobs. A side chute dispensary allows you to direct product in a controlled fashion, or, if working on bigger jobs you have the option of pouring out the front for a higher volume pour.

The reversible revolving paddles optimize mixing and are powered by a hydraulic chain and sprocket drive motor that operates under 3050 PSI of pressure. An integrated bag splitter sits on top of the bucket, so you can easily pour concrete in from the top or scoop it up while driving. Mix it on the go and be ready to pour as soon as you reach your destination.

TMG Industrial 60" Skid Steer Concrete Mixer Attachment, Side Chute
